LABOR CATEGORY DESCRIPTIONS

Subject Matter Expert II

Brief Description and Experience Requirements

Serves as senior advisor/analyst that has acknowledged specialized acquisition, logistics, technical and/or business expertise in the specific functional tasks required for performance in an individual task order. May serve as the primary customer point of contact for an activity. Nationally or industry recognized in field of expertise. 10 years experience of recognized defense/industrial or acquisition expertise in the field of expertise.

Education Requirements and Substitutions for Education and/or Experience Requirements

Master's degree (Doctorate preferred) in a technical, business or management area. Bachelor's degree with an additional 5 related years of experience may be substituted for the advanced degree requirement.

Subject Matter Expert I

Brief Description and Experience Requirements

Serves as senior advisor/analyst that has specialized acquisition, logistics, technical and/or business expertise in the specific functional tasks required for performance in an individual task order. May serve as the project lead for either a contract or task. May serve as primary customer point of contact for an activity. 5 years experience of defense/industrial or acquisition expertise in the field of expertise.

Education Requirements and Substitutions for Education and/or Experience Requirements

Master's degree in a field related to the task. Bachelor's degree with an additional 3 related years of experience may be substituted for the advanced degree requirement.

Program Manager III

Brief Description and Experience Requirements

Provides supervision/management of the activities and staff of a research, technical, business, education or training unit. 10 years experience in managing technical programs and staff of a research, technical, business, education or training unit.

Education Requirements and Substitutions for Education and/or Experience Requirements

Bachelor's degree (graduate degree preferred) in a technical, business, education or related field.

Program Manager II

Brief Description and Experience Requirements

Provides supervision/management of the activities and staff of a research, technical, business, education or training unit. 7 years experience in managing technical programs and staff of a research, technical, business, education or training unit.

Education Requirements and Substitutions for Education and/or Experience Requirements

Bachelor's degree (graduate degree preferred) in a technical, business, education or related field.

Program Manager I

Brief Description and Experience Requirements

Provides supervision/management of the activities and staff of a research, technical, business, education or training unit. 5 years experience in managing technical programs and staff of a research, technical, business, education or training unit.

Education Requirements and Substitutions for Education and/or Experience Requirements

Bachelor's degree in a technical, business, education or related field.

Engineer IV

Brief Description and Experience Requirements

Performs work in which the principles, theories and general body of knowledge of engineering or science are required. Provides specific high level skills and capability to a program. 15 years experience in leading and directing technically challenging aerospace projects.

Education Requirements and Substitutions for Education and/or Experience Requirements

Bachelor's degree (graduate degree preferred) in engineering, physical sciences or a related field.

Engineer III

Brief Description and Experience Requirements

Performs work in which the principles, theories and general body of knowledge of engineering or science are required. 10 years experience in leading and directing technically challenging aerospace projects.

Education Requirements and Substitutions for Education and/or Experience Requirements

Bachelor's degree (graduate degree preferred) in engineering, physical sciences or a related field.

Engineer II

Brief Description and Experience Requirements

Performs work in which the principles, theories and general body of knowledge of engineering or science are required. 5 years experience in leading and directing technically challenging aerospace projects.

Education Requirements and Substitutions for Education and/or Experience Requirements

Bachelor's degree in engineering, physical sciences or a related field.

Engineer I

Brief Description and Experience Requirements

Performs work in which the principles, theories and general body of knowledge of engineering or science are required. 10 years experience in leading and directing technically challenging aerospace projects.

Education Requirements and Substitutions for Education and/or Experience Requirements

Bachelor's degree in engineering, physical sciences or a related field.

Sr. Administrative Assistant

Brief Description and Experience Requirements

Performs office administration and secretarial work, preferably involving the management of financial, contractual and personnel records. 4 years experience.

Education Requirements and Substitutions for Education and/or Experience Requirements

Bachelor's degree. Additional 2 years of experience may be substituted for the degree requirement.
